

SHARPLINE MISSION

To be the leader in the field of designing / developing / marketing and manufacturing graphic image products. Through team cooperation and superior service, build a safe, secure, and profitable business for the benefit of all employees and customers.

SHARPLINE QUALITY STATEMENT

Sharpline is committed to continuous quality improvement of product and process through the review of Sharpline goals, preventative actions and corrective actions. Management shall ensure that the importance of meeting customer, as well as regulatory and legal requirements, is effectively communicated to the organization.

Restylers Conference

Sharpline recently hosted a group of customers holding their 2023 Conference at the Wichita facility. The Restylers International group has been purchasing from Sharpline's Automotive Division for more than 30 years. The organization has over 200 active members across the United States that are professional automotive restyling companies selling and installing graphics, striping, window tint, paint protection film, and other accessories to car dealerships and to the public.

During their visit, our customers got to watch demonstrations of Sharpline's DuraShield Titan paint protection film, SolShield window tint, and our CXG-9 ceramic coating product.

In addition, the RI group also received a grand tour of the newly remodeled production facility and front offices.

Jack Snyder speaks to the Restylers International group during their conference.

Retirement

On February 3, Sherri Land retired from Sharpline after 16+ years of service as an administrative assistant to Jack Snyder.

6 Easy Tips For Better Nutrition

Would you like to have more energy, be more productive, and feel happier? Giving your nutrition a boost could help you accomplish all three. Better nutrition doesn't necessarily mean completely overhauling your diet. Instead, try these simple steps for incorporating healthy choices into your current routine.

- 1. Make smart swaps.** Substitute whole-grain rice for white rice and fruit for sugary treats.
- 2. Drink more water.** The Centers for Disease Control and Prevention (CDC) recommends women drink 2.7 liters of water per day and men drink 3.7 liters of water per day. Getting enough water is great for your energy level, skin, joints, and more. Note: Living or working in hot, humid environments, and extended periods of strenuous exercise may increase daily needs.
- 3. Track what you eat.** Looking back at what you have eaten over a day or a week may help you make healthier choices in the future.
- 4. Cook at home more often.** Zipping through the fast food drive-through is easy. But fast food is often high in fat, sodium, and preservatives—and low in nutrition. Cooking (or even just "assembling") meals at home gives you more control and may also save you money.
- 5. Keep healthy snacks on hand.** Think of healthy snacks you will actually eat, and keep those at home, in your car, and at work. (Nuts, apples, and bananas are great snack options that don't need refrigeration.)
- 6. Change it up.** A big key to a healthy diet is eating a variety of fruits, vegetables, and lean proteins. One way to think of it is in terms of color—try to eat healthy foods in a variety of colors each day.
